## PROJECTS

- Login-Signup ([code](#)) - For every application before use we have to log in and if we are already login then we have to do signup.
- Hangman ([code](#)) - This is a word guessing game if the user guesses right then the man will not hang if the user guesses wrong then the man will hang and the man will die and you will lose.
- Request ([code](#)) - The requests module allows you to send HTTP requests using Python. The HTTP request returns a Response Object with all the response data.
- Web-Scraping ([code](#)) - I did a web scraping task using the Rotten Tomato website. I did 13 tasks of web scraping. In this, I request data on movies from Rotten Tomatoes.
- Cow-Bull ([code](#)) - This is a positional numerical guessing game. If the user guesses the right number and the right position of the number then it's bull otherwise cow. If the user will guess the right number and right position then the user will win or lose.
- Calculator ([code](#)) - In this Calculator, we can perform basic operations like addition, multiplication, subtraction, and division.
- Rock Paper Scissors ([code](#)) - Rock, Paper, Scissors. The familiar game of Rock, Paper, Scissors is played like this: at the same time, two players display one of three symbols: a rock, paper, or scissors. Rock beats scissors, scissors beat paper by cutting it, and paper beats rock by covering it.

## INTERESTS

Hiking, Camping, Travelling, love to read psychology facts and eager to explore new Places.

## DECLARATION
